“Biodiversity sanctuaries”

Common characteristics:

- Aiming for zero pest densities
- In areas with substantial and permanent reinvasion risk
- Reintroduction of missing biotic elements
- Direct and substantial community involvement
- Experiments to restore real New Zealand ecosystems

Making a difference for a truly green New Zealand

Manaaki Whenua
Landcare Research

Aims of Workshop/Hui

- Foster exchange of information between projects
- Present current and relevant research, technology and practice
- Identify possible cooperative actions between projects
- Identify and plan ways to address common research and policy needs
